DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally understandable but written in a fashion that is yet confusing and may confuse a routineer in the art were the claims to issue as written. For example, the stepping piezo packet appears to be a part of the clamping piezos. Also it appears that the clamping piezos have a free end, which is understood, since they are attached at each end.

Allowable Subject Matter

Claims 1-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not show or fairly suggest use of orthogonally positioned pairs or pluralities of piezoelectric stacks, held under compression, supported at one end by a rigid reference element and a semi-rigid (elastic) bridging part at the other end for clamping.

Conclusion

Art Unit: 2834

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited reads on at least some aspects of the claimed prior art.
